

Fixed Assets Management & Tracking

Managing and tracking fixed assets is one of the management important concerns. *AssetMaster* helps you to control and track your different type of fixed assets.

What is *AssetMaster*?

Managing and tracking fixed assets is one of the management important concerns. *AssetMaster* helps you to control and track your different types of fixed assets.

Track the movement of assets

AssetsMaster enables you to track assets movement from one location to another and from one cost centre to another using bar code readers and labels (offline tracking) and by using RFID technology.

Follow-up on assets disposal

You can also use *AssetMaster* to follow-up on assets disposal according to disposal type (sell, depreciation, etc).

Manage depreciation

AssetMaster evaluates, manages, and estimates depreciation of fixed assets according to the depreciation type used by your organisation (location and group).
